

牛人计划-中级项目课（5）

牛客网
NOWCODER

第五课

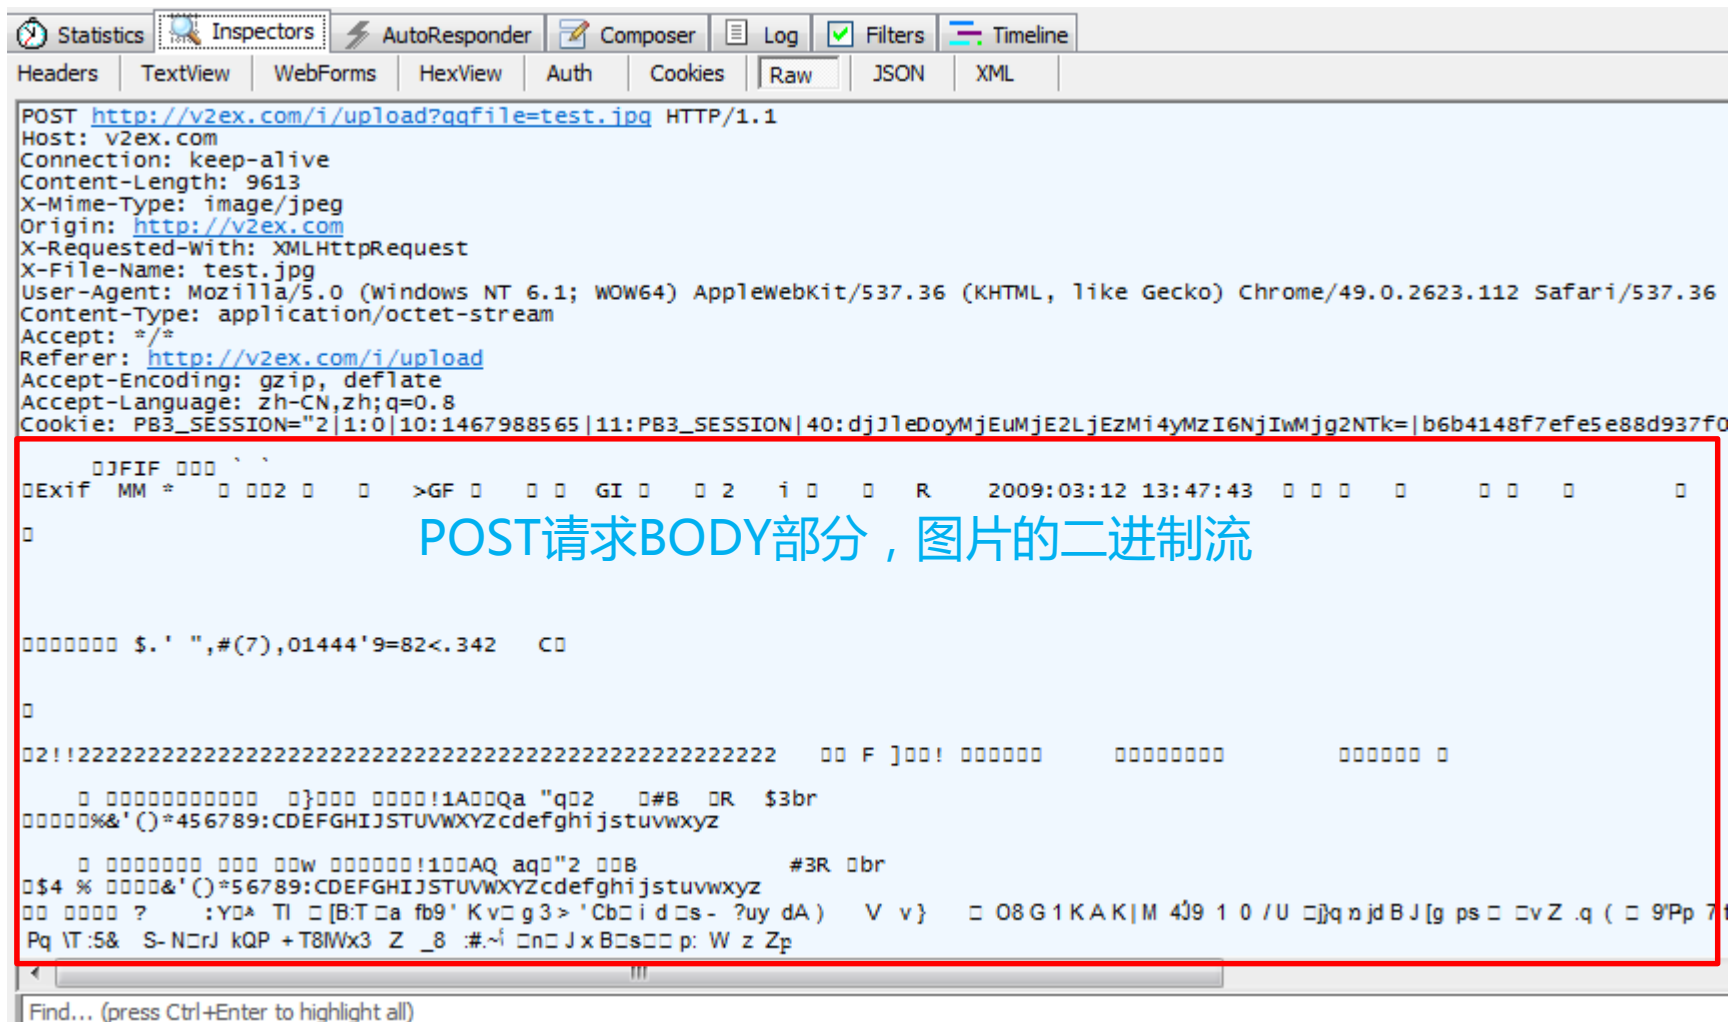

课程目录

CONTENTS

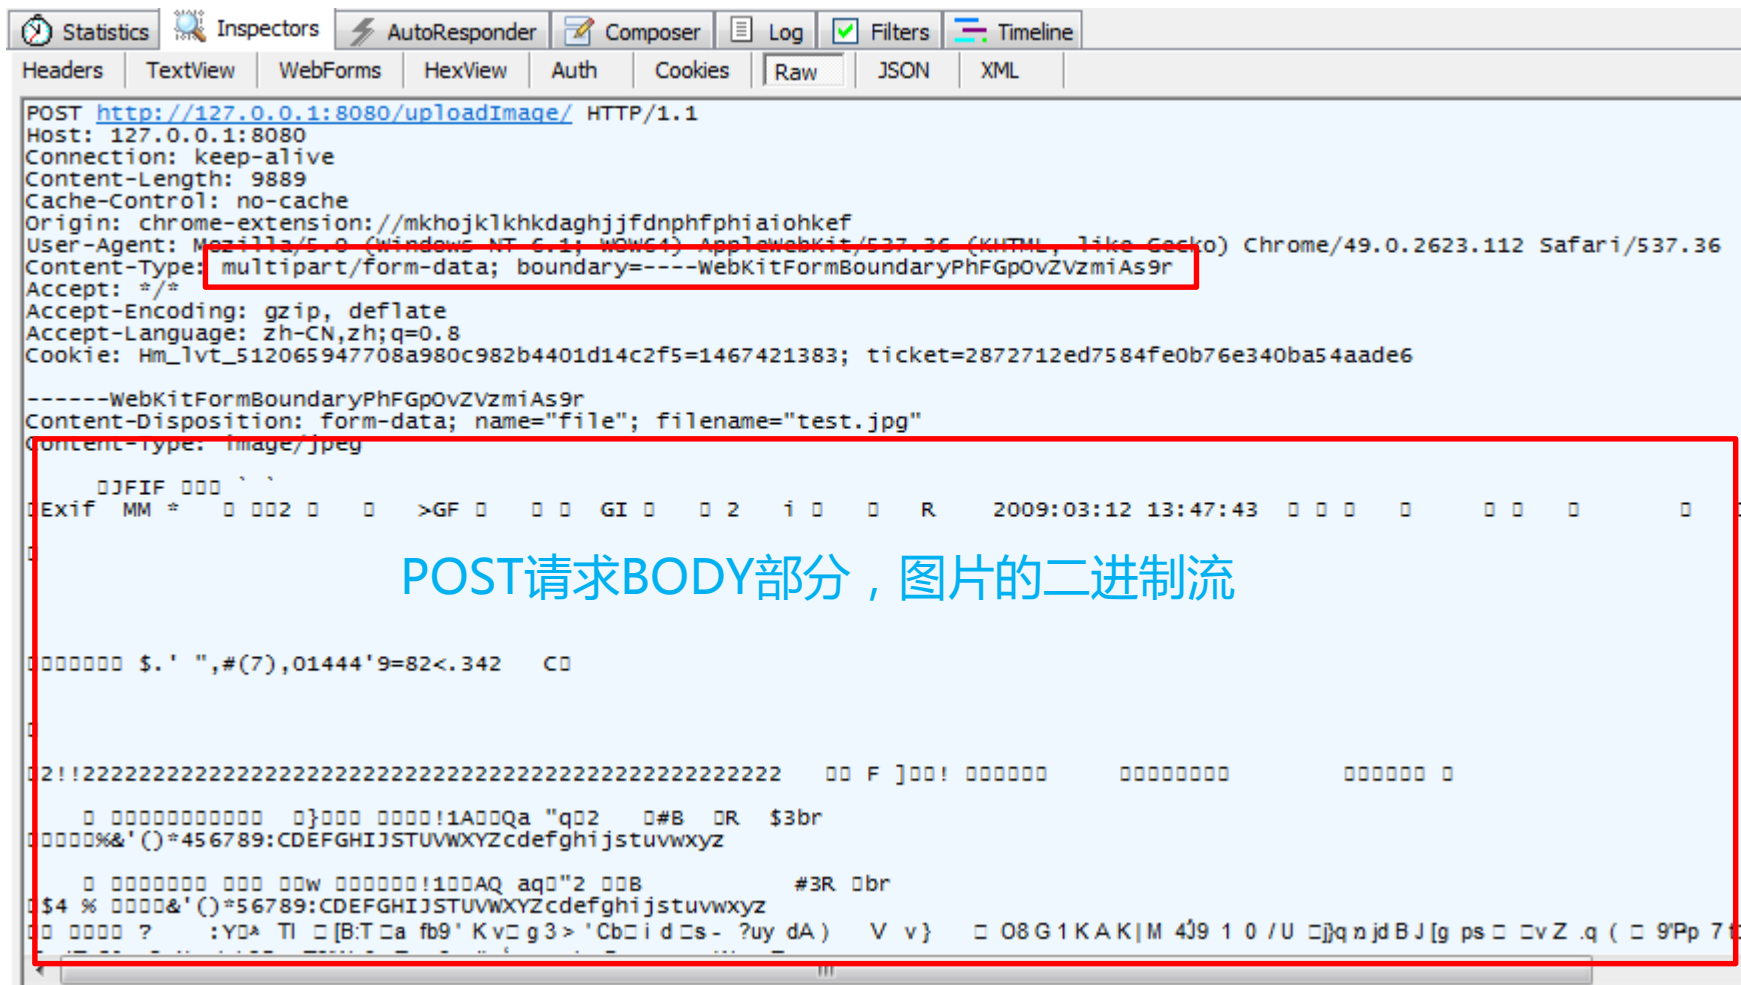

- 图片上传
- 七牛云服务集成
- 资讯发布

HTTP POST 单变量

HTTP POST 多变量

文件上传（代码演示）

```
@RequestMapping(path = {"/uploadImage/"}, method = {RequestMethod.POST})
@ResponseBody
public String uploadImage(@RequestParam("file") MultipartFile file) {
    try {
        String fileUrl = newsService.saveImage(file);
        //String fileUrl = qiniuService.saveImage(file);
        if (fileUrl == null) {
            return ToutiaoUtil.getJSONString(1, "上传图片失败");
        }
        return ToutiaoUtil.getJSONString(0, fileUrl);
    } catch (Exception e) {
        logger.error("上传图片失败" + e.getMessage());
        return ToutiaoUtil.getJSONString(1, "上传失败");
    }
}
```

```
public String filesUpload(@RequestParam("files") MultipartFile[] files)
```

图片下载（代码演示）

```
@RequestMapping(path = {"/image"}, method = {RequestMethod.GET})
@ResponseBody
public void getImage(@RequestParam("name") String imageName,
                    HttpServletResponse response) {
    try {
        response.setContentType("image/jpeg");
        StreamUtils.copy(new FileInputStream(new
            File(ToutiaoUtil.IMAGE_DIR + imageName)),
            response.getOutputStream());
    } catch (Exception e) {
        logger.error("读取图片错误" + imageName + e.getMessage());
    }
}
```

七牛云存储

冗余备份，统一访问，CDN缓存同步，多机器并发

pom.xml

```
<dependency>  
  <groupId>com.qiniu</groupId>  
  <artifactId>qiniu-java-sdk</artifactId>  
  <version>7.1.1</version>  
</dependency>
```

官方文档：<http://developer.qiniu.com/code/v7/sdk/java.html#upload>

NOWCODER.COM
牛客网-中国最大IT笔试/面试题库

云实时缩图

阿里云

http://images.nowcoder.com/images/20150205/60_1423125965233_60_1423125960758_%E7%AE%A1%E7%90%86%E5%91%98%E5%A4%B4%E5%83%8F.png@0e_100w_100h_0c_1i_1o_90Q_1x.png

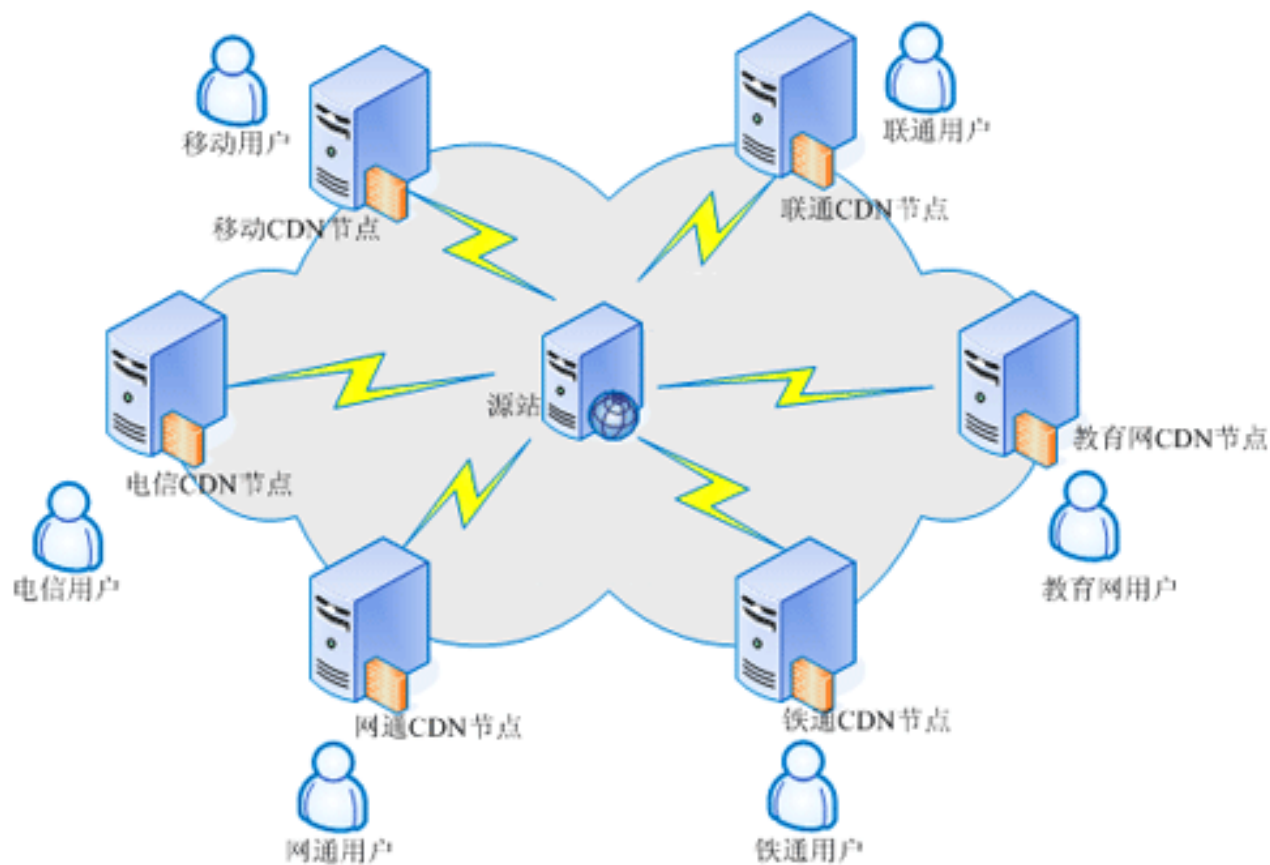

七牛云

<http://developer.qiniu.com/code/v6/api/kodo-api/image/imageview2.html>

优点：灵活，降低冗余，统一管理

静态独立/CDN

资讯发布（代码演示）

课后作业

- a) Fiddler HTTP格式了解
- b) 七牛云/阿里云 帐号申请 云SDK上传文件
- c) MutipartFile 熟悉
- d) 资讯字段检测加强

Thanks
